

ANKIT MISHRA

+91-8850807970 Mumbai, Maharashtra, India Email LinkedIn Github

SUMMARY

Final-year CS Engineer (AKTU, 2026) with hands-on experience in full-stack development and machine learning. Deployed production ML model (CatBoost, 91.26 accuracy, F1: 0.87) using FastAPI, Streamlit, and Joblib on Render. Engineered production backend for renewable energy ERP with Node.js, Express.js, MongoDB, JWT authentication, and 4-tier RBAC. Proficient in Python (scikit-learn, Pandas, NumPy), machine learning workflows, feature engineering, model evaluation, and RESTful API design. Ready to build scalable systems combining backend architecture and AI/ML impact.

SKILLS

Languages & Frameworks

- Python (FastAPI · Streamlit)
- JavaScript (ReactJs · NodeJs · ExpressJs)

Machine Learning & Statistics

Supervised Learning · Unsupervised Learning · Model Evaluation & Validation(Hyperparameter Tuning · Overfitting · Cross-Validation) · EDA & Data Cleaning · Feature Engineering & Feature Selection

Database & ML Libraries

MySQL · MongoDB · Joblib · Scikit-Learn · Pandas · NumPy · Seaborn

Version Controls & Tools

Git · Github · Docker · Render

SUMMER TRAININGS & INTERNSHIPS

Summer Training — AI, ML & Robotics (Enrolled Trainee)

Jun 2025 – Aug 2025
3 months

IIT Allahabad (IITA)

- Benchmarked 4+ ML algorithms (Logistic Regression, Random Forest, KNN, RAG) on 100K+ records; achieved **94.56% accuracy** using feature engineering and cross-validation in a cohort of 50 trainees.
- Prototyped Arduino automation systems (sensor and laser modules) and operated ROS robotics workflows across virtualized OS environments.

SELECTED PROJECTS

Loan Prediction Model | Python · CatBoost · FastAPI · Streamlit | **Live** | **GitHub**

May 2026

- Engineered features from 1,000 loan records and benchmarked 6 ML models (Gradient Boost, Decision Tree, Logistic Regression, SVM, XGBoost, CatBoost); selected CatBoost achieving **91.26% accuracy** (Approval: F1=0.87, Recall=0.98; Rejection: F1=0.58, Precision=0.89), outperforming XGBoost by 11.26%.
- Deployed ML inference API with FastAPI backend + Streamlit UI using MinMax Scaler preprocessing and Joblib serialization; achieved less than 100ms prediction latency with 99%+ uptime on Render.

Solar Inverter ERP System | React · Node.js · Express.js · MongoDB | **Live** | **GitHub**

March 2026

- Engineered MongoDB schemas for 4 role-based modules (Customer, Sales, Engineer, Admin) supporting complete ticket lifecycle: creation, diagnosis, repair, dispatch, and delivery.
- Built RESTful APIs in Express.js for round-robin sales assignment, AMC contracts, SLA breach monitoring, and GST-compliant billing; automated invoice generation reducing manual processing time.
- Secured APIs with JWT auth, refresh token rotation, HTTP-only cookies, and 4-tier RBAC system; implemented Helmet.js headers and rate limiting preventing unauthorized access.

EDUCATION & CERTIFICATIONS

B.Tech. in Computer Science

Graduating in: 2026

Dr. A P J Abdul Kalam Technical University, Lucknow

Oracle Generative AI Certificate

October 2025

Oracle University - Virtual

- Completed certification demonstrating knowledge of Generative AI concepts, model fundamentals, and practical applications by successfully passing the official certification exam.
